Handcrafted furniture from reclaimed materials

## BAR STOOL- FIR

The taller brother to our Douglas Fir chair. Salvaged timbers lend a unique character and sense of history. The vertebrae back design, reminiscent of Frank Lloyd Wright, uses nails from the salvaged wood. Backboards in colorful green paint or bookmatched fir that sweep almost to the floor. Impressive. The perfect perch for minstrels and sidekicks. Available in counter height or bar height.

Dimensions: 16"w 18"d 43"h

Seat height: 30"

Material: Douglas Fir salvaged from industrial demolition sites. The limited supply of specific materials means that each stool is unique.

Finish: Hand finished with tung oil. Over time the wood acquires a rich amber patina.

Upholstery: Leather, hemp, or customer-supplied material.

Production Time: 8 - 16 weeks
